cherif bassiouni is often referred to as the father of international criminal law every major international criminal law instrument developed in the last forty years from the torture convention to the statute of the international criminal court bears his hallmark his writings diplomatic initiatives fieldwork and even litigation have made an unparalleled contribution to the emergence of international criminal law as a distinct discipline within the field of international law this book contains a collection of fifteen scholarly essays written by leading experts from around the world about the theory and practice of modern international criminal law with a focus on cherif bassiouni s unique legacy within this important area among the contributing authors are louise arbour un high commissioner for human rights mahnoush arsanjani chief of the un office of legal affairs codification division diane orentlicher un independent expert on combating impunity michael reisman former president of the inter american commission for human rights yves sandoz director for international law of the international committee of the red cross william schabas member of the sierra leone truth commission brigitte stern advocate for the bosnians in the world court s genocide case and prince hassan bin talal first president of the assembly of states parties of the international criminal court

the theory and practice of translation first published in 1982 and a companion work to toward a science of translating brill 1964 analyses and describes the set of processes involved in translating bible translating the focus of this work offers a unique subject for such a study as it has an exceptionally long history involves more than 2 000 languages a vast range of cultures and a broader range of literary structures than any other type of translating not only of interest to biblical scholars therefore this work explores issues of textual meanings and the procedures for communicating these meanings into other languages and cultures

there is an historical element throughout philosophy as edel notes this is always in the context of problems so emphasis will fall on the major objective of reflective analysis of ideas the major objective of edel s analysis in the theory and practice of philosophy is the fundamental interrelatedness of problems of method metaphysics and value each part is an integral whole complete in itself that

philosophy has this central role in human practice indicates that it should be neither discarded nor deified this is the explicit premise of the book students are likely to be faced increasingly with a demand for clarification on the fundamental issues of life and value the expectation that philosophy will provide ready made answers to these kinds of questions is as naive as the demand for any panacea but this task cannot be turned over to any other department of human knowledge or any other branch of social activity by placing emphasis on the importance of theory in matters of practice the need for clear and systematic understanding of the world and man within it and on the constant role of reflection in the management of human affairs edel seeks to shed light on the larger questions of philosophy by examining them in a systematic way the result is a great text and tool for students and teachers that deals directly with the fundamental issues of our civilization

this volume first published in 1982 is a collection of original essays written to honour professor w arthur lewis 1979 co winner of the nobel prize in economics the authors an international group of distinguished scholars address a varied set of specific issues reflecting professor lewis research interests covering topics which include technological change in agriculture analyses of unemployment and income distribution the role of government policy in the development process the historical record of development and the relationship between developed and developing nations the book will be of interest to both the academic researcher and practicing professionals in the international organisations and national governments and are particularly appropriate to graduate courses in economic development cost benefit analysis and economic history

between 1989 and 1992 three colloquia on transformation problems were held at the ludwig reimers stiftung bad homburg at the end of the 1980s the collapse of the soviet type socialist economic system had become clear and hence the necessity to transform these systems into an entirely different economic order similar processes have happened and still happen in other historical constellations for instance in developing countries it has been the aim of the transformation colloquium to gain more theoretical insight into these phenomena the object of research has been transformation defined as transition from a given economic order socialist planned economy e g to a consistent new order market economy this is a highly complex phenomenon which occurred above all during the 20th century introduction and abolition of socialist systems transition from war economies to peace time market economies historical experience allows perhaps for certain generalizing abstractions the central problem discussed at all up to now three colloquia is the question whether the object is amenable for theoretical analysis and which approaches eventually are promising

the nobel prize winning father of modern portfolio theory returns with new insights on his classic work to help you build a lasting portfolio today contemporary investing as we know it would not exist without these two words portfolio selection though it may not seem revolutionary today the concept of examining and purchasing many diverse stocks creating a portfolio changed the face of finance when harry m markowitz devised the idea in 1952 in the past six decades markowitz has risen to international acclaim as the father of modern portfolio theory mpt with his evaluation of the impact of asset risk diversification and correlation in the risk return tradeoff in defending the idea that portfolio risk was essential to strategic asset growth he showed the world how to invest for the long run in the face of any economy in risk return analysis this groundbreaking four book series the legendary economist and nobel laureate returns to revisit his masterpiece theory discuss its developments and prove its vitality in the ever changing global economy volume 2 picks up where the first volume left off with markowitz s personal reflections and current strategies in this volume markowitz focuses on the relationship between single period choices now and longer run goals he discusses dynamic systems and models the asset allocation glide path inter generational investment needs and financial decision support systems written with both the academic and the practitioner in mind this richly illustrated volume provides investors economists and financial advisors with a refined look at mpt highlighting the rational decision making and probability beliefs that are essential to creating and maintaining a successful portfolio today

monthly index of surgery and gynecology in vol 9
